01 Professional summary

Frontend Developer with 6+ years of commercial experience building internal web applications, modern corporate websites, and enterprise business automation solutions.

Skilled in **JavaScript (ES6+)**, **Astro**, HTML5, CSS3, Docker, SQL, and Git. Delivered responsive user interfaces, led the modernization and migration of corporate web platforms, and built SharePoint-based inventory systems adopted across 12 international offices.

Currently expanding capabilities into modern **React** and **TypeScript**. Actively exploring AI-assisted engineering workflows (LLMs, AI agents), applying modern AI tooling to accelerated research, prototyping, workflow automation, and daily development tasks.

03 Work experience

Frontend Developer

Euro-Center Holding SE

2020–Present

Prague, Czech Republic

- Leading the complete technical modernization and migration of the corporate website (euro-center.com) to the modern **Astro** framework, fully deployed and managed within the **Microsoft Azure** ecosystem (Azure Repos, CI/CD), significantly improving load performance, Core Web Vitals, and maintainability.
- Containerized the corporate WordPress platform using **Docker** on a dedicated Linux server in a secured **DMZ** environment; executed seamless server migrations and maintained corporate web infrastructure with 99.9% uptime.
- Developed and deployed a SharePoint-based Global Inventory system adopted by operational teams across 12 international offices.
- Built interactive internal interfaces with JavaScript, HTML, and CSS for corporate employees managing business data, reporting, and operational records.
- Automated employee onboarding, administrative workflows, and operational requests using Power Automate and SharePoint integration.
- Administered Azure environments and executed SQL queries for business data operations.

Technical Support Specialist (1C)

Ista Corporation s.r.o.

2018–2020

Prague, Czech Republic

- Provided technical support for 1C business software, investigated complex user issues, and ensured day-to-day software stability.

Junior Frontend Developer

HSI, spol. s r.o.

2017–2018

Prague, Czech Republic

- Supported web application development using JavaScript, HTML, CSS, and SQL; worked on UI implementation and database integration tasks.

Earlier experience

2008–2017

Technical helpdesk, Apple · Sales-Manager, DiViPiX s.r.o. · Expert, Auction House “Kleynod” · Chief Specialist, Kyiv city state administration · Chief Executive, Auction House “Kleynod”

04 Selected web projects

CORPORATE CLOUD MODERNIZATION

Euro-Center

Architected and executed the migration of the corporate portal from a dedicated Dockerized WordPress setup to a cloud-native **Astro** solution hosted in **Microsoft Azure** (Azure Repos). Greatly improved performance, security, and maintainability.
